

# Competence Center

## Integrated Financial Architecture

The Competence Center IFA - Integrated Financial Architecture supports our customers in all relevant topics related to financial architecture and data management:

- » Architecture consulting
- » Data integration and tools
- » Data models and modelling
- » Processes and organisation
- » Release and testmanagement

**Always based on our extensive banking expertise and our understanding of banking products.**

Our experts have many years of project experience in the area of overall bank management, in-depth knowledge of bank products and their data modelling in a homogeneous, neutral model, the successful implementation of regulatory requirements for data logistics, e.g.

- » BCBS 239
- » MaRisk

as well as a wealth of technical know-how for data integration and best practice methods. Data governance and data quality is an integral part of the financial architecture for the success of our system connections and supplies with all relevant information.

Our technical competence includes the implementation of solutions with regard to the ETL principles of performance, maintainability and modularisation, the use of various tools for data integration, e.g.

- » Ab Initio
- » SAS
- » Java
- » Cobol

**and databases, e.g.**

- » Oracle
- » DB2
- » Exasol

modern technical data modelling, e.g.

- » Data Vault
- » Data Lake

and the customised development of additional tools in data logistics, e.g. for automated job scheduling (Python, Shellscripting).
