

Infographic Regulatory Reporting

With the Competence Center Regulatory Reporting companies are prepared for all kinds of regulatory requirements and receive competent support in order to implement their topics efficiently and sustainably.

Our view

- | | |
|---------------------|-------------------------------|
| German Messages | Equity Capital (requirements) |
| Financial Reporting | Liquidity |
| Disclosure | RegTech |
| Risk & Settlement | Statistic Reporting |

Specialist competence

Tracking/Market monitoring of the new regulatory adaptations (AI/RPA)

Creation of pre-study documentation (preparation of regulation, GAP analysis, project planning, risk analysis)

Support with end-to-end implementation projects (conception, testing, specialist processes and go-live)

Hands-on mentality with the creation of messages and communication

Technical competence

- » Processing of technical GAP analyses
- » Creation of IT concepts and implementation of individual and standardized software
- » Configuration and parametrization reporting software (e.g. Abacus)
- » Application support reporting: pre-processing and software
- » Migration projects, incl. tool development
