

SMARAGD IAC

Get a high-performance Alert Management for the future now!

The goal in the use of SMARAGD IAC in SMARAGD TCM is a relief for the compliance department with a high security and quality. SMARAGD IAC analyzes the alert and delivers a justified decision for the further processing. The predominant mass of alerts can be processed fast and automatically and even be pre-determined. The analyses of existing customer data showed that the workload can be reduced by 45 per cent.

Continuously growing requirements for compliance

Even with new
sanction regulations:
SMARAGD IAC
performs effortlessly!

In 2022 (as of August) over 6 new sanction regulations

For one of our customers an IAC model was initially trained with alerts from 2020-2021. Later the result was validated with data from October 2021-April 2022. In this period many new sanctions were implemented.

Result of the analysis or validation: 99 per cent of all transactions that have to be stopped were correctly found by the model.

This shows that our approach and the IAC model are generalized and robust. In practice it can deal with spontaneous and unseen sanction changes.

SMARAGD IAC supports you in your daily work and with unexpected additional efforts.

SMARAGD IAC offers:

- Reduced Workload
- Cost Saving by machine check
- SMARAGD IAC performance is independent of the number of alerts
- Increase of Employee Satisfaction by process optimization
