

COMPETENCE CENTER

Integrated Financial Architecture

○ Support with all topics in respect to Financial Architecture & Data Management

Architectural Consultancy

Data Integration

Data Models & Modelling

Processes & Organization

Release & Test Management

○ targens Expertise

- › Project experience overall bank management
- › Knowledge of bank products and banking data modelling
- › Implementation of regulatory requirements data logistics (e.g. BCBS 239)
- › Expertise in data integration
- › Best practice methods
- › Data governance
- › Data quality

Functionality & Technology from one source

○ Technical Competence

- › Use of various tools for data integration (e.g. Ab Initio, SAS, Java)
- › Databases (e.g. Oracle, DB2, Exasol)
- › Modern technical standards for data modelling and data storage (e.g. data vault, data lake)
- › Customized development of additional tools for data logistics
- › Longstanding experience in the important aspects of data integration (e.g. performance, maintainability, modularization)
